

- Cut along bottom dashed line.
- Fold paper under for lines 1 - 5 in order.
- Fold line 6 down where the grey and black parts meet.
- Fold line 7 so that all of the white (top) side is hidden.
- Fold the wings back around 8 and 9 so you can't see the dashed lines.
- Gently fold the wings upward while pinching the number '7'.
- Fold lines 10 and 11 so that the wing tips point up.
- Next, tuck the number '12' up through the center fold so that a small white triangle sticks up through the top of Dream Chaser. This is the most difficult step and may be skipped.
- Staple the center fold between the landing gear on the bottom side.
- Enjoy flying your very own Dream Chaser!
