

WiZRD™ Smart Phone

WiZRD™

Smart Phone

The SNC C4N WiZRD Smart Phone is a GPS-equipped, internet-enabled communications device. In addition to traditional cell phone capabilities, the WiZRD runs C4N's software suite. This includes C4N Video, which allows the user to stream/record/view live video from the device's camera. C4N Maps allows the user to view other WiZRD device locations on its map. The WiZRD also supports email and Chat messages. The platform currently supports Windows Mobile 6.1, Windows Mobile 6.5, and Android support is under development. The WiZRD is capable of acting as a USB Host and providing a VGA Out signal via its included accessory cables. The resistive touchscreen works with any input device, including gloved fingers.

Processor: Marvell PXA310 @ 624MHz

OS: Windows Mobile 6.1,
