

eHealth & Remote Monitoring Solutions

SNC provides integrated eHealth & Remote Monitoring solutions that automatically capture, store and communicate critical, real-time patient status and treatment information from the point of care, throughout transport, to the receiving medical treatment facility. Our novel approach allows care providers to focus on patient vs. documentation. Receiving clinicians can prepare and reduce the time to definitive care; and remote clinical specialists can provide tele-mentoring and consults to remote care facilities during prolonged field care.

eHealth & Remote Monitoring Solutions

Remote Monitoring Advantages

Automated Patient Data Management

Automatic data capture & near-real-time data flow; hands-free, wire-free, voice-free solutions thru Bluetooth, WiFi & Ultra-Wide Band networks

FDA-Certified Patient Monitor Integration

Enables care provider to take advantage of latest commercial-off-the-shelf patient monitoring technology

Remote Monitoring Portal

Customizable web portal to present ER/ICU dash boards for incoming patients; tele-mentoring portal option includes a reach-back directory to on-call clinical specialists

Tactical & Commercial Communication Options

Robust communication protocol designed to work with any IP based Tactical Radio Network

Improved Patient Medical Record

De-identified patient data is stored for electronic Patient Care Record close out & import to patient's medical record

Use Cases

SNC's eHealth & Remote Monitoring solutions are adaptable and scalable to successfully handle a wide variety of pre-hospital care use cases including: medical evacuation, casualty evacuation, aeromedical evacuation, critical care air transport, disaster recovery, prolonged field care and mass casualty use cases. Our carry-on systems are customizable to achieve the care provider's goals, while also addressing the mobile air or ground platform certification requirements.

Real-time Patient Monitoring

Improved Patient Situational Awareness

Remote Consults with Specialists

Compliant Cloud Care Solutions

We provide secure, HIPAA-compliant video conferencing and data share suites that can be driven over an open-network. Files are stored in the Cloud and viewed in a browser with no need for downloading or local storage, making our systems compatible with nearly any computer or device. We understand not all health care takes place in cutting-edge hospitals with large IT staff and huge data pipes so our technology is designed to support eHealth & Remote Monitoring consults on as little as a 3G cell phone connection with full functionality.
