

SNC | **AWARE**

All-Domain Edge Node

Informed, Meaningful Maneuver Solutions at the Edge for All Domains

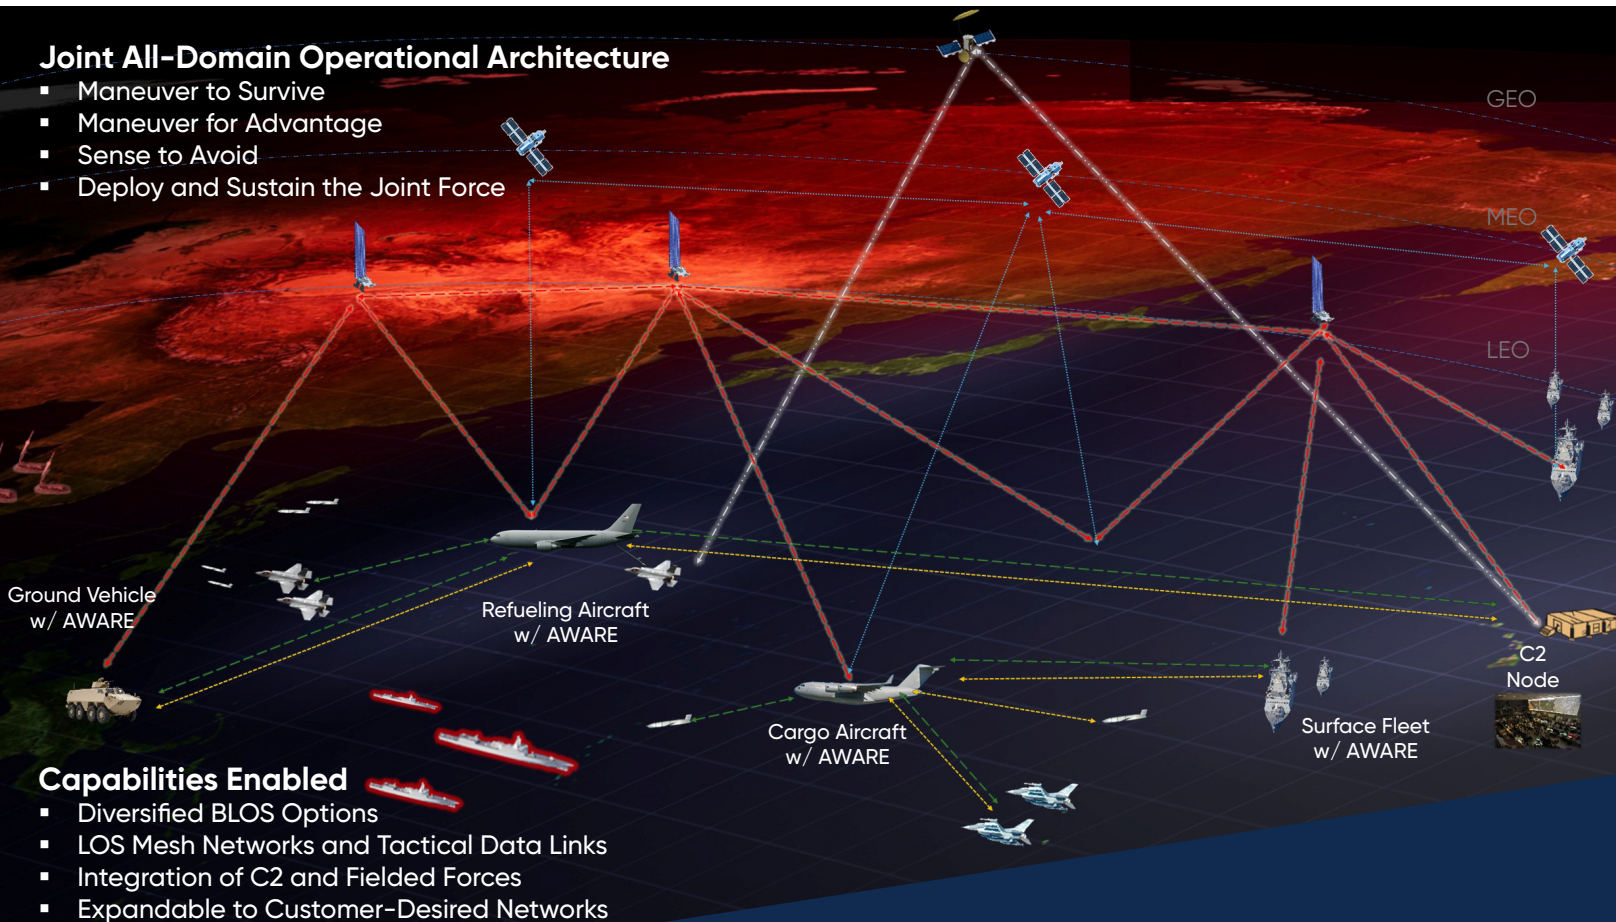

SNC's AWARE All-Domain Edge Node for connectivity equips fleets with real-time situational awareness. It provides both line-of-sight and beyond-line-of-sight common data link access, using customer-selected links and networks, along with a secure Mobile Ad-hoc Network. This seamless connectivity is enabled by SNC's open mission system architecture (OMS/UCI, UDL, AMS-GRA). The result is a platform agnostic, flexible, reliable situational awareness at your fingertips.

Comprehensive, Layered Approach

-  SNC common architecture for connectivity and survivability across the fleet
-  Enables survivable aircraft, ships and vehicles to serve as critical nodes during air, land and sea operations
-  High operational utility with rapid platform integration (months to weeks) while maintaining unit affordability
-  Over-the-air updates and new 3rd-party applications to the field to support live operations NOW
-  Common operation picture for better data interpretation and decision-making
-  Rapid software development and 3rd-party application integration with DevSecOps pipeline
-  Born out of the latest US Military standards, AWARE is intrinsically aligned with and connected to critical military networks. It is configured upon order with customers' desired networks and comms links
-  Proven through multiple live-operational exercises and real-world operations

Joint All-Domain Operational Architecture

- Maneuver to Survive
- Maneuver for Advantage
- Sense to Avoid
- Deploy and Sustain the Joint Force

Capabilities Enabled

- Diversified BLOS Options
- LOS Mesh Networks and Tactical Data Links
- Integration of C2 and Fielded Forces
- Expandable to Customer-Desired Networks
